01 · THE CORRIDOR

Five nodes between Buffalo and Albany.

A fabrication corridor is being assembled along I-90: a $100B [1] megafab at Clay, the country's EUV research center at Albany [9], and the talent infrastructure between them. Scrub the timeline.

PART TWO — THE MEASURED REALITY

Sections 01–05 drew the promise from announcements, agreements, and the environmental record. From here, every number is a measurement from a public statistical agency — and some of the most important ones are missing. The absences render too.

Semiconductor employment today: hundreds, not thousands.

The measured baseline, refreshed from BLS and IPEDS: county semiconductor employment where the agencies publish it[30], and suppression where they don't.

MEASURED FIG. 06A — SEMICONDUCTOR EMPLOYMENT BY CORRIDOR COUNTY

THE LABOR SHED EXISTS. 08 FOLLOWS THE FEDERAL DOLLARS →

08 · FOLLOW THE MONEY

Announced, obligated, outlaid — and not yet recorded.

The most consequential number in this ledger is the one that is not there. Commerce has published no award record for the Micron funding agreements — 20 months after signing — the obligation column is the absence the plate documents [6] [34].

MEASURED FIG. 08 — FEDERAL AWARD LEDGER AS RECORDED IN USASPENDING, RETRIEVED 2026-09-02 · TODAY COPY LINK

CHIPS direct funding — Micron NY + ID (Dept. of Commerce / NIST) FAIN: not published

ANNOUNCED	$6.165B [5] [6]
OBLIGATED	not published
OUTLAID	not published

AS OF RETRIEVAL, COMMERCE HAS PUBLISHED NO AWARD RECORD FOR THE MICRON FUNDING AGREEMENTS TO USASPENDING — THE ONLY CHIPS INCENTIVES (CFDA 11.037) AWARD RECORDS ARE THE TSMC AND SK HYNIX LOANS. THE ABSENCE IS THE DATAPOINT. [34]

NSF EMERGE-MICRO — RIT + MCC + FLCC (cooperative agreement) FAIN 2347157

ANNOUNCED	$999,997 [8]
OBLIGATED	$999,997 [34]
OUTLAID	$0 reported to date

CHIPS DIRECT FUNDING DISBURSES AGAINST MILESTONES, SO OBLIGATED ≠ BEHIND-SCHEDULE — THE GAP IS THE DESIGN OF THE AGREEMENT. THE $5.5B GREEN CHIPS PACKAGE IS A NEW YORK STATE PERFORMANCE-BASED TAX CREDIT AND DOES NOT APPEAR IN FEDERAL SPENDING DATA — THIS LEDGER TRACKS FEDERAL FLOWS ONLY.

What to watch next

- 3,000–4,000 construction workers, 2027[14] → watch the quarterly QCEW refreshes[30]
- Fab 1 operations, 2030[13] → watch Onondaga NAICS-3344 employment[30]
- A Micron award record appearing on USAspending[34] → the ledger's absence inverts; this tracker checks daily

FIRST, WHAT THE RECORD DOESN'T SAY →

THE HONEST MARGINS

What the record doesn't say (yet).

1. The construction ramp-down after 2041 is illustrative — no cited figure describes how the workforce winds down.
2. The talent lattice's ribbon widths are illustrative; only its structure — who feeds whom — is cited.
3. No NYISO document publishes a full-buildout megawatt figure; the cited interconnection requests stop at Fab 2[24].
4. Commerce has published no award record for the Micron funding agreements[34] — the ledger renders the absence.
5. QCEW counts every NAICS-3344 employer in a county, not Micron headcount[30] — the plan series and the measured series answer different questions.
6. OEWS publishes no semiconductor-technician wage for either corridor metro[31] — the occupation the buildout most needs is the one the survey can't yet see here.

NOW THE RECORD ITSELF →
